Two Negroes Paying the Penalty of their Crimes—A Confusion on the Gallews. CHARLOTTESVILLE, June 18.-Joe Barbour and Horses Terrill were hanged at 9 A.

M. to-day in the jail yard here, the former for
the murder of Randail Jackson, and the latter
for the murder of Mary Foster, aged 11. The criminals and their victims were all colored. The hanging was private, twenty-four invited citizens, the officers of the law, and Company D. Third Virginia Regiment, being present.

Joe Barbour confessed his crime. He said:
"On the night that Randail Jackson was killed, we'were going down the street, having started home. I tried to get Bob Lewis to go back up town and get something : think it was whiskey. Randall Jackson caught Bob Lewis by the arm and told him to come and go home. neked Jackson what he had to do with it. I

and I told him to go back up the street. I asked Jackson what he had to do with it. I don't remember what he said. I struck him with a knife and ran off."

Barbour said he believed God had forgiven him and he was ready to die. Horace Terrill did not conless his crime.

Joe Barbour and Kandall Jackson, two colored men, comparative strangers, who lived in the country, came to town on Nov. 17, 1883, and met in a barroom, where they became acquainted and drank together several times. On their way home at night, in company with several others, Barbour proposed to Jackson that they return to town for more whiskey. Jackson refused, and Barbour drew a large dirk knife and, without a word, thrust it into Jackson's neck, nearly severing his head from his body, besides stabbing him in other places. Boon after he had been sentenced to be hanged Barbour sent for a minister, made a confession of the murder and a profession of religion, and requested to be baptized; but before the minister could make the necessary arrangements the prisoner made a desperate attempt to escape by cutting his way out of jail with a coid chisel and a file. In this attempt he was detected. He afterward remarked that he would be willing to die if he could have the pleasure of killing those who had informed on him. The minister, upon hearing this remark, declined to perform the right of baptism.

Terrill's crime was the murder of Mary Foster, aged 11, on Saturday, Oct. 4, 1884. During the absence of her mother Terrill went to the house, and took the child into a clump of bushes on a cliff some distance from the house, where he criminally assaulted and then killed her. Terrill was seen going in the direction of the Foster house on the day of the murder, and the tracks of a man leading directly to the place where the body was found were identified that he were where the body was found at the request of Crawford, who, he claimed, in assaulting the girl had struck her with a rock. Crawford was sent to State prison for ten years. The general impression is

WILL THE CROTON HOLD OUT? Chief Engineer Birdeall Says that the Aque-duct Won't Break Open.

"The city receives 100,000,000 gallons of water a day through the old aqueduct." said the chief clerk of the Aqueduct Commission, yesterday. "On cold days the supply does not keep up the level in the Park reservoirs, and pipes from freezing; on hot days the supply is inadequate also, so that only in moderate weather can the city be said to have a full supply. It will be thirty-three months from Jan. 1 ast before the new aqueduct will be completed. Then the city can obtain 250,000,000 gallons a day, provided the supply does not run short. There is less danger of a famine this year than people suppose. A few years ago the water ran down until there was only enough to last twenty days. Then the rain came.

In the entry to the office of Chief Engineer Birdsall of the Croton Aqueducty esterday, was a section of a small water main that had been taken from the streets. It was onerusted with dirt and eaten to plees by rust.

"We lose about 5,000,000 gailons of water a year through defective pipes," said Mr. Birdsall. "We wanted to relay a lot of pipes down by the river front this year, but the Board of Estimate was afflicted with a touch of false economy and we failed to get the money to the vaste goes on. Then we were cut down so that we were colliged to discharge a lot of men who were used to hunting up waste, and the waste therefore increases. We wanted to put in a lot of meters, but we could not be the money to do that with. We know just where they are meeded, and we could save 10,000,000 gailons a juid put them in. There is another waste that is difficult to get at. Aftere is a dry spein people begin to his water famine. We were never in a few condition to supply the city, notwiths and in the following spein in the quantity of water. The storage reservoirs are alifull. The dry time came on early, thas been a had drought. But the records of the department, taken over a long sories of the department of the pace of the department of the departmen

We are as anxious to keep people from wasting water as any one, but we cannot try to frighten them by saying that there will be a famine, which is simply only a remote possibility."

"But suppose the aqueduct should break."

"It won't break. It is in better condition now than it was five years ago."

He turned around quickly and saw another well-dressed young man making off with a camel's-hair shawl, which belonged to Mrs. Earle. He seized his whip and ran after the thief, who darted off toward Third avenue. At the same time the other man ran in an opposite direction. The coachman's long coat retarded him, and the thief gained. He shouted "Stop thief!" and some boys joined in the chase. The thief ran into the hallway of 1.272 Third avenue. Boon he came out of 1.272 and walked slowly up Sixty-fourth street, where he was arrested. The shawl was found under a refrigerator in 1.272 Third avenue.

Dorn had provided for his bride. At the close of the ceremony the forty or fifty guests danced merrily to the music furnished by an aged darky fiddler. At 11 o'clock the unexpected arrival of Thomas Petal, stepfather of the groom, put a sudden stop to the enjoyment. For some time he had been on bad terms with his stepson, and he broke into a rage when he found his wife among the guests.

"Put on your things," he shouted. "This is no place for you."

Mrs. Fetal obeyed the anary mandate, and quickly left the room. Her husband, however, did not join her, but, drawing a long knife, rushed to where the bride and groom were standing, brandished the knife, and exciatmed: "I'm going to make a funeral of this along with a wedding."

Before the desperate man could be disarmed he slashed his stepson with the knife in a shocking manner, cutting him twice in the legand once in the lower part of the abdomen. Still brandishing the knife, he left the house, scattered the panic-stricken guests who were collected on the sidewalk right and left, and went to his home at 105 Fleet place, where he was subsequently arrested. Van Dorn's injuries are serious, and may prove fatal.

BUFFALO FOR BRIGHT'S DISEASE OF THE KIDNETS.

DR. WM. A. HAMMOND

DR. WM. A. HAMMOND

Of New York, Surgeon-General United States Army retired, Professor of Diseases of the Mind and Nervow System in the University of New York, &c.

"I have for some time made use of the Buffalo Little Water in cases of affections of the Nervous System, complicated with Bright's Disease of the Kulneys, or win a Gouty Disthesis. The results have been einheafty satisfactory. Lithis has for many years keen a favority remedy with me in like cases, but the Buffalo Witer certainty acts better than any extemporaneous schildren of the Lithia state, and is moreover better borne to the stomach. I also often prescribe it in those cases of Cerebrai Hypergamis resulting from over-mental work—in which the condition called Nervous Dyspepsis exists—and generally with marked beneal." DR. HARVEY L. BYRD,

DR. HARVEY L. BYRD,
Late Professor of Practical Medicine, Baltimore Medical
College.

"I have witnessed the best results from the action of
the Buffalo Lithia Water, Spring No. 2, in Chronic Goot,
Rheimatic Goot, Rheimatism, Gravel, and Stone in the
Bidder, and I do not hesitate to express the opinion
that in all diseases depending upon or having their arigin in Uric Acid Diathesis it is unsurpassed, if indee it is
equalled, by any water thus far known to the profession.

"It has an ascertained value in Bright's Disease. A
knowledge of its action in that disease thus far would
seem to warrant the belief that it would, in many instances, at least in its early stages, arrest it entirely,
and in its more advanced stage prove a decided confort and palliative.
"It is powerfully Antacid, and especially efficacious in
what is commonly known as Acid Dyspepsis." Water, in cases of one dozen half-gallon bottles, \$5 per age at the Springs. Pamphlet sent to any address. THOMAS F. GOODE, PROPRIETOR,
